

# MATCHING

Draw a line from the equipment name to the corresponding definition.

**Groover**

Hoisting device equipped with a boom and cables that will pick up a load, move it to another position, and set it down again.

**Pump**

Flat circular steel with diamond-tipped teeth used for sawing hardened concrete.

**Vibrator**

Tool used to form grooves or joints in a concrete slab before hardening.

**Power  
trowel**

Tool used to level concrete with the form edges.

**Diamond  
blade**

Equipment that forces concrete through a pipeline or hose.

**Screed**

Power-driven system of blades that floats on fresh concrete to produce a smooth, polished finish.

**Crane**

Machine that stirs up fresh concrete to release air bubbles.
