

The Lakes

Main Contractor: Grasshopper Development

Sub Contractor: Kerblin Concrete Contractors & Kerb and Concrete

Supplier: Supacrete Concrete

Date: May 2007 onwards

The Lakes, which on its 254 hectares will eventually have 2100 homes and a population of 7000 – equal to that of the neighbouring town of Te Puke. The commercial area will be a small suburban shopping centre comprising cafes, a garden centre, a hairdresser, and the usual convenience shops. There will also be a childcare centre and a comprehensive medical centre.

Extensive parks, reserves, children's playgrounds, lakes, walks and cycleways will be features of The Lakes. Kerblin Concrete Contractors and Kerb & Concrete between them laid eight kilometers of kerbing and 13,500 square metres of exposed aggregate footpaths, driveways, and vehicle crossings up to Christmas 2007. A multi coloured gold aggregate exposed concrete is the main distinguishing theme that interconnects these areas.
