

# Do you need your materials moved?

Depo to Depo \$100 +gst per hour

**New to the fleet**

## We can help

- ✓ FULL CONTRACT
- ✓ DRIVEWAYS
- ✓ PATIO'S
- ✓ VEHICLE CROSSING'S

*Including excavation, boxing, placement & finishing, concrete supply, expansive cuts or to meet your specific requirements*

- COLOURED CONCRETE •**
- DECORATIVE CONCRETE •**
- EXPOSED AGGREGATE •**
- PLAIN CONCRETE •**

**Other services include Commercial Pavement, Parking Areas, Tennis Courts, Contract Floors, Concrete Supply**

**“Simply the Best”**

# PROGRESS REPORT?

**What type of plant grows over 15 meters high and 43 meters long?**

## **A Concrete Plant**

A site worth driving past and viewing is the new Supacrete Plant at 23 Maleme Street as the main infrastructure is now in place. This includes a drive through concrete structure batching plant, flanked by two aggregate weigh and storage hoppers holding well over 500 ton of materials for concrete manufacture. We are looking forward to an open day which will be held towards the middle of the year.

## Be Wise this SUMMER - Slip Slop Slap

**If you have been feeling the heat this summer then so has your concrete. If you need hydration because of water loss then so has your concrete, the same rules apply.**

**1/ Use retarder** - Concrete placers need to finish concrete in a timely fashion or it is going to prematurely dehydrate, shrink and crack. With the temperatures around 28 – 30 degrees Celsius, a full dose of retarder is recommended to slow the chemical reaction of the cement and water.

**2/ Use some form of antivap, or fog sprays** - If the wind is whipping that moisture away from the surface of your skin it is doing to the concrete allowing the top surface to harden early and possibly crack.

**3/ Man Your Concrete** - Make sure the volume of the concrete ordered matches the resource to place and finish. Ideally concrete should be on the ground and in place within \_ hour of it arriving on site and while 2 persons may be able to handle a 20 m<sup>3</sup> of concrete in winter, they may struggle and will not be doing the concrete any favors' on a hot day.

**Other services include Commercial Pavement, Parking Areas, Tennis Courts, Contract Floors, Concrete Supply**
